

5.0 Experience / key personnel / membership of trade associations

5.10 Experience

5.101 The relining method Flexiliner II was developed by KRT AG

KRT AG is the owner of the licence.

Since 1987 it has been used for over 80 km of sewers

Licences for the Flexiliner system have been given to companies in Germany, France and the United Arab Emirates.

5.102 The partial relining method Flexiliner P/S was also developed by KRT AG and launched on the market in 1992.

5.103 We have many years of experience in the use of sewer robots. Together with the company PMO AG in Dübendorf we have developed our own robot system. In 1994 we launched the product and also started to use it.

5.104 Other methods have also been developed together with other companies and used by our technicians, such as:

- Relining method (hard relining) in pipelines and short pipes*
- Sealing method with PUR injection and injection cement*
- Renovation of supports with ZM injection*

5.0 Experience / key personnel / membership of trade associations
